Kirinyaga University September 2019 – May 2023

BSc Computer Science

SKILLS

Database: MongoDB, SQL, Firebase, Postgres
Languages: JavaScript, C#, .NET, Typescript.
Frameworks: Express (Nodes), React.js
Tooling: Git and GitHub, Azure DevOps.

WORK EXPERIENCE

Engineer – Griffin Global Technologies **April 2026 – Present**

Currently working on **BCHH**, an integration platform that consolidates and synchronizes data from three major clients. My responsibilities include ensuring continuous and reliable data polling, maintaining and enhancing the integration layer, developing new features based on evolving client requirements, and supporting backend processes such as polling APIs and scheduled jobs to ensure smooth system operations and automation.

Associate Engineer – Griffin Global Technologies **Apr 2024–Mar 2026**

Worked mostly on both internal and client projects using .NET and React/Angular. I have helped my team ship 3 key internal projects that are Resource utilization management, training management system and pricing estimation tool for the company. I also worked on Client backend project as one of the backend dev and my work was to ensure polling API and working with Schedule jobs.

.NET DEVELOPER – Griffin Global Technologies **JAN 2024 – Mar 2024**

Joined Jitu as a .NET Developer intern and my role is building full stack web applications that use C#, .NET and any other frontend and backend frameworks.

React Developer–ITR SOLUTONS Nairobi Kenya **Aug 2023 – Dec 2023**

I do work part time as a react developer for ITR solutions. My role involves creating responsive web design using react js. I am currently working on a hospital management system known as Check app.

VOLUNTERSHIP AND INTERNSHIP

SOFTWARE ENGINEER ATACHEE – Jitu Nyeri Kenya **May 2023 – July 2023**

Part of Kirinyaga university Jitu training Cohort 1 where I did learn SERN stack development, it has truly helped me polish up my backend skills and learnt working with SQL database something I had not worked before with.

SOFTWARE DEVELOPER INTERN – Move Tech LTD Nairobi Kenya **June 2022 – October 2022**

Worked on Automated Form Project using MERN stack technology. Did learn about system design best practice and CLI/CD of a project. Below is my recommendation from my supervisor Recommendation

PROJECTS

KYUSDA PROJECT – Team Lead **August 2022 – Dec 2022**

Build a church web application that helps church leaders to keep track of the church members, share information and Events. The church system is built using **Mongo db. Express, React**, **Node js , Sanity CMS** **kyusda.co.ke**

LEADERSHIP, COMMUNITY INVOLVEMENT AND HACKATHONS

MICROSOSFT STUDENT AMBASSADOR **August 2022 – Present**

I do host meetups to teach my peers how to code and use various Microsoft Technology.
